

COMPARISON: KNOW WHAT YOU'RE GETTING

ElectraTile ESD Tile from United SCP	“Construction Grade” SDT Tile (similar in appearance to standard VCT)
Static Conductive for optimum performance. Flawless performance that <u>always</u> passes combination resistance values with drag chains, ESD chairs, and mobile equipment	Static Dissipative ONLY, may not interface well with drag chains, ESD chairs and mobile equipment
Pressed 100% Homogenous Solid Vinyl	Vinyl COMPOSITION contains fillers (like limestone)
Conductive elements permanently pressed into the tile. Performs flawlessly at any humidity level and NEVER fails an ESD Audit	Contains a chemical designed to absorb ambient humidity for conductivity. Without the Floor finish and over time these tiles often fail ESD audits
NO ESD Floor Wax Required	REQUIRES ESD Floor Finish from the manufacturer at a cost of about \$100 per gallon. Must be applied frequently.
TWENTY Year Warranty, lifetime conductivity	5 Year warranty
>2,500 PSI Static Load ASTM F-970). ElectraTile will NOT snap, break, nor crumble.	<u>75</u> PSI Static Load ASTM F-970). Tile may snap, break, and crumble
Micro Edged for near seamless appearance and treated to avoid shrinkage	1' x 1' tiles only. Brittle, not for use with flash coving
Cost per Square foot: \$6.39 with quantity discounts on large orders	Cost per Square foot \$11.11. Source: Floor City, price check on 8.30.24

Outstanding Color Selection, Generally In Stock, Major ISO approved Manufacturer

ElectraTile is Fully Compliant to CDHP Method V1.2

ElectraTile 12" x 12" ESD Tiles

ElectraTile is a technologically advanced flooring system specifically designed to control static discharge in ESD sensitive areas. ElectraTile has conductive elements interspersed throughout the entire thickness of the tile, thus providing one of the fastest and most complete electrostatic charge decay ratings of any flooring material on the market. ElectraTile is meant for permanent installations over properly prepared concrete, wood, and other approved subfloors using our conductive adhesives.

ElectraTile is a technologically advanced flooring system specifically designed to control static discharge in ESD sensitive areas. ElectraTile has conductive elements interspersed throughout the

ElectraTile is Compliant to the Latest Standards:

ElectraTile easily meets the stringent ANSI ESD S20.20-2021 and many NFPA and DOD standards. ElectraTile doesn't require humidity, ESD floor finish or other topical treatments to maintain its stellar static control properties.

ElectraTile is chair caster rated and handles heavy industrial traffic. Whether your ESD Floor is new or 30 years old THIS is a material you can depend on. Its clean room compliant, DOP Free, and offers excellent stain resistance properties.

And, with ElectraTile Flooring you receive one of the strongest warranties in the industry backed by the outstanding reputation of one of the largest vinyl flooring manufacturers in the world. ElectraTile Tames the Static Beast!
