

[ESD Flooring Installation Web Page](#)

**Are there any special security concerns with gaining access to the job site?**

**Are our installers required to be in a Union?**

**MATERIALS YOU WISH US TO QUOTE** (please place an x next to your preference)

ESD Tiles  
ESD Sheet Vinyl  
ESD Carpet  
ESD Epoxy Paint  
ESD Concrete Sealer

**BALL PARK ANTICIPATED SQUARE FOOTAGE:**

**NEW CONSTRUCTION OR EXISTING CONSTRUCTION?**

**CURRENT FLOORING TYPE:** (please highlight or check)

NEW Concrete slab (down less than a year).  
Unsealed concrete slabs (dull not shiny and readily absorbs water)  
Sealed Concrete (shiny, will not readily absorb water)  
Concrete covered with old mastic or flooring adhesive (estimate %)  
Concrete that is oily, greasy, stained or potentially contaminated.  
VCT (standard tiles)  
Glued Down Carpet  
Carpet over padding  
Epoxy  
Paint  
Other (please specify)

**SITE CONDITIONS:** Are the following items functional?

HVAC System?  
Overhead Lighting?  
Water?

**CURRENT SUBSTRATE CONDITION:**

Excellent  
Fair  
Poor  
A Disaster!

Note: Photos of the substrate or a short video or face time with our engineers are helpful, please send if possible. For contacting us via face time for a virtual walk thru please schedule an appointment by contacting [steve@unitedscp.com](mailto:steve@unitedscp.com)

**NUMBER OF ROOMS OR AREAS TO BE COVERED:**

[ESD Flooring Installation Web Page](#)

**AMOUNT OF ENCUMBRANCES** (fixtures permanently attached to the substrate):

Lots    Some    None

**IS A PRINT AVAILABLE IF NEEDED?**

**LOCATION OF POTENTIAL INSTALL:**

City

State

Country (if not in the USA):

**ANTICIPATED START DATE:**

**IS THIS A WORKING FACILITY** (will employees be present when flooring installation is in progress):

**HOURS OF ACCESS: Can we work at any time during the day?**

**HOURS OF ACCESS: Are nights and weekends also acceptable if needed?**

**INBOUND SHIPPING:** Does this location have people on site to accept shipments of our inbound flooring materials?    Does this location have a delivery dock?

**SECURITY:** Is the receiving area secured?

**DUST:** The installation process may generate slight to moderate amounts of dust. Is this a problem?

**PROJECT MANAGEMENT:** It is our feeling that good communications between the client and our install team is imperative to the success of the project. As such United SCP requests that an approved client representative be available at the start of the install and each morning during the various install phases. The client is encouraged to review the previous day's workmanship, make suggestions and ultimately sign off on the work in progress alleviating surprises at the end of the installation. Will someone from your team be available?

**WALL BASE:** Do you wish us to quote on installation of wall base (the vinyl material that borders the floor and bottom of the wall)?

**EXPANSION JOINTS:** (ElectraGuard Only) Expansion joints and saw cuts are designed to reduce cracks and fractures of the concrete slabs. Some clients prefer these to be filled and sanded flat in order to provide a "seamless" ESD floor. Filling the expansion joints will not aid conductivity and an additional cost will be incurred. Although rare, these expansion joints may expand to the point of cracking the topical fill. Thus, expansion joint repair is not covered under our standard warranty.

**Do you wish us to quote on filling the expansion joints and saw cuts?**
