

# MP-1235

## Miniature Probe

### Description:

This optional probe is used with the RT-1000 Standard Resistivity Tester. It accurately measures surface resistivity and conforms to the EOS/ESD 11.11 specifications.

### Specifications

#### Features

Two miniature conductive brass external probes

Two female banana jacks to fit any high quality resistance/resistivity meters such as RT-1000 meter

Will measure resistance of all small surfaces according to ESD S11.11

Conforms to all EOS and CE test procedures

#### Dimensions

##### Device:

- L: 1.5"  
- W: 0.9375"  
- H: 1.0"

##### Probes:

- L: 0.375"  
- W: 0.375"  
- H: 0.125"
